August 28, 2019

Good day,

My name is Curtis Hayes and I am interested in pursuing an opportunity with OkCupid as a software engineer.

Currently I am residing in Shanghai and I am looking to relocate to another part of the world including self repatriating to the United States. I have over 20 years of programming and management experience in various industries ranging from finance to mobile development.

My breadth of experience includes working as a data analyst with Lehman Brothers to creating niche community websites during my time at The Net Circle. In addition to coding using PHP, Java, and NodeJS, I have developed my management skills, first as a Scrum Master and later as a Project Manager at Reign Design. Currently I am applying my skills towards developing a Python authentication system using AWS services including but not limited to AWS Recognition and Lambdas.

My experience, desire to learn, and an ability to perform independently or as part of a team can be an asset for OkCupid. I also believe a position with OkCupid will afford me the opportunity to keep abreast of new technological trends, such as machine learning, and apply that knowledge.

After you have had an opportunity to review my qualifications outlined in the attached resume, please do not hesitate to contact me.

Thank you for your consideration

Sincerely yours,

Curtis Hayes
